

Power spectrum

- $f_{\min}$  (with  $S_{\text{low}} = 2$ )  
-.-  $f_{\max}$  (with  $S_{\text{high}} = 10$ )

Absolute difference between analytical and numerical ACVF

- $S_{\text{high}} = 2$      $S_{\text{high}} = 10$      $S_{\text{high}} = 100$   
 $S_{\text{high}} = 5$      $S_{\text{high}} = 50$
